THERE are thousands of Young Men, as well as MIDLE AGED and Uld Men, who are suffering to some extent from the above diseases. Mans, perhaps, are not aware of their true condition, or when assistance is really needed.

For the beach of such, we herewith give a few of the most common symptoms, viz: Weakness of the Back and Lindo, Pain in the Head and Side, dimners of Sighs, Dats and Webs before the Eyes, Palspitation of the Heart, Physpepsia, Loss of Memory, Confusion of the ass. There said of Spirits, Astronomical the Assistance of the Society, Self-District, Timiday, etc. For each and all of the above symptoms these remedies will be found a "Sovereign Balm."

These remedies embrace three prescriptions: A hox of Viride Tonic Pills, all of which have important offices to perum, and should be used together in every case. Their superiority over other modes of treatment may be briefly stated as follows, viz:

IF They immediately arrest noctural and diurtices to perunded.

## Suspension of the New York Banks. [From the Tribune of Monday.]

For the second time in but little over four years the bnnks of New York have suspended specie payments, and it is a curious coincidence that now, as in the other case, they solentitly resolved a week or two before that they would not suspend. The wind blew a hurricane all night. taken in addition some six millions per week. It has been for many days apparent to any one watching the course of the specie reserve that the question of suspension was only one of this week or next. The payments into the Sub-Treasury on the calls of Mr. Cisco, iustead of returning to the bank vnults in three or four days, were absorbed in some other quarter, with still other amounts in addition. The loss of gold by the banks in two weeks has reached about \$16,000,000, which has ty has been destroyed by these freshets than gone to the interior, to Boston, and into private poekets. The combined decrease in two weeks of the banks and Sub-Treasury, it will be seen, is very large:

The first would be an extension of the American principle on the right of scarch, as we never elained to be exempt from search for articles contra-band of war. But our interest has usually been in favor of the utmost extension of neutral rights, and if we are glad to give up the rebels to preserve our cherished principle, we ought to be still happier if their delivery extends it. And on the same principle that a man gives up his purse to a highwayman to save his life, we had better give up these unimportant prisoners on any terms, than to have the navy and army of ngland brought to the aid of the rebellion, for the sake of holding them. Our civil war is an honorable excuse for avoiding a foreign war on nny point which does not involve national independence and territorial integrity Were our power unbroken at home, we should not submit to this demand from England; but under those circumstances, England would never have unde such a demand. In submitting to the necessity, we hope the correspondence has been conducted with dignity to abolish privateering and protect from seizand honesty on our side.

But the belligerent propensity developed in the English people of all classes by this event, is a warning to us that war with England is a contingeacy which we may calculate upon as impending. No person engaged in one of the mechanical or manufacturing pursuits should think of "doier without" the SCIENTIPIE AMERICAN, It costs but four cents per week; every number contains from six to ten engravings of new muchines and inventions, which can not be found in any other publication. It is an established rule of the publishers to insert none but original engravings, and those of the first class in the art, drawn and engraved by experienced persons under their owe supervision.

TO THE INVENTOR.

TO THE INVENTOR.

The Scientific American is indispensable to every inventor, as it not only contains illustrated descriptions of nearly all the best inventions as they come out, but each number contains an Official List of the Claims of all the Puleuts issued from the United States Palent Office during the week previous; thus giving a correct history of the progress of inventions in this country. We are also receiving, every week, the best scientific journals of Great Britain, France, end Germeny; thus placing in our possession all that is transpiring in mechanical science and art in these old countries. We shall continue to transfer to our columns copious extracts tinue to transfer 'o our columns copious extracte from these journals of whatever we may deem of interest to our readers.

CHEMISTS, ARCHITECTS, MILLWRIGHTS, AND FARMERS.

AND FARMERS.

The Scientific American will be found a most useful journal to them. All the new discoveries in the science of chemistry are given in its columns, and the interests of the architect end carpenter are not overlooked; all the new inventions and discoveries appertaining to these pursuits being published from week to week. Useful and practical information pertaining to the interests of millwrights end mill-owners will be found published in the Solkstiffic American, which information they ernnot possibly obtain from any other source. Suljects in which planters und farmers are interested will be found discussed in the Scientific American, most of the improvements in egricultural implements being illustrated in its columns.
